1. Claims 36, 38 and 39 are pending.
2. Applicant is required to insert the 35 USC 371 data on the page of the specification.
3. All rejections of record have been removed only the new ground of rejection is remaining.

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 36, 38 and 39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 36, line 9, recites "whereby cAMP levels vary with expression of the reactant". However, in a review of the specification, it appears to the Examiner that cAMP production causes reactant levels to increase, not the reverse. So, the claim would be more clear if written "whereby reactant expression varies with the levels of cAMP".

Claim 38 recites the limitation "reactant enzyme". There is insufficient antecedent basis for this limitation in the base claim 36.
